PROFESSIONAL SUMMARY

Computer Science graduate specializing in data analysis and business intelligence, with hands-on experience across Python, SQL, Excel, Power BI, DAX, and Power Query. Skilled in data cleaning, exploratory data analysis (EDA), ETL, data modeling, and building interactive dashboards that turn raw data into actionable business insights. Backed by four Microsoft Power BI certifications and end-to-end analytics project experience. Seeking a role as a Data Analyst or Power BI Developer.

CORE SKILLS

Programming & Querying: Python, SQL

BI & Visualization: Power BI, DAX, Power Query, MS Excel (Pivot Tables, VLOOKUP), Plotly, Data Visualization, Dashboarding, KPI Reporting

Data & Analysis: Pandas, NumPy, EDA, ETL, Data Modeling, Data Cleaning, Statistical Analysis, Data Storytelling

Databases: MySQL, PostgreSQL, MongoDB

Tools & Platforms: VS Code, Git, GitHub, Jupyter Notebook, Google Colab, Streamlit

INTERNSHIP EXPERIENCE

Software Engineer Intern — Wisdom Sprouts

Dec 2024 – Feb 2025

Full-Stack Development (MERN)

- Developed a full-stack restaurant website on the MERN stack (MongoDB, Express.js, React.js, Node.js), delivering end-to-end functionality from database to UI.
- Designed and implemented RESTful APIs to connect frontend and backend systems, enabling reliable, real-time data exchange.
- Managed a MongoDB database and implemented full CRUD operations, ensuring efficient and accurate data handling.
- Built responsive, cross-device user interfaces to improve usability and overall user experience.

PROJECTS

Air Quality Index (AQI) Analysis Dashboard | Python, Pandas, Plotly, Streamlit

- Built and deployed an interactive Streamlit dashboard to analyze air quality data across multiple cities and surface pollution trends.
- Performed end-to-end data cleaning and transformation on raw AQI datasets, then designed visualizations covering seasonal trends and city-level pollution patterns.
- Identified high-pollution regions and quantified the correlation between PM2.5 levels and overall AQI, translating findings into clear, decision-ready insights.

Secure Role-Based Access Control (RBAC) System | React.js, Node.js, Express.js, PostgreSQL

- Implemented secure Role-Based Access Control with authentication and authorization across three user roles — Student, Faculty, and Admin.
- Built a full-stack web application with seamless frontend–backend integration and a scalable, role-based database architecture.
- Designed and integrated RESTful APIs for attendance, assignments, examinations, fee management, placements, and messaging/notifications.

Personal Portfolio Website | React.js

- Designed and developed a responsive personal portfolio to showcase projects, technical skills, and education to prospective employers.

CERTIFICATIONS

- Preparing Data for Analysis with Microsoft Excel — Microsoft
- Harnessing the Power of Data with Power BI — Microsoft
- ETL in Power BI — Microsoft
- Data Modeling in Power BI — Microsoft
- Data Visualization-I — Anudip Foundation, METTL Certified (Grade A), Nov 2025

EDUCATION

B.E. in Computer Science — Alard College of Engineering and Management, Pune (Savitribai Phule Pune University)

2026

Higher Secondary Certificate (HSC) — Barashiv Hanuman Junior College, Hingoli

2022
